Next Generation Messaging

Messaging applications are the main-stay of Value Added services in all leading fixed and mobile networks; however they are often undervalued as a revenue-stream. Teligent's Next Generation Messaging applications provide a wide-range of functionality with one aim in mind: driving call-completion revenue.

Call completion is the number one VAS revenue-stream and our applications ensure you are not missing out on potential revenue by providing a first-class messaging experience to your subscribers.

Enhance your business

Every unanswered call in your network is a source of potential revenue which Teligent's Messaging applications can help you to capture. By providing a wide-range of flexible features to your subscriber base and making it as easy as possible to handle messages Teligent Telecom's Messaging Applications ensure that your subscribers won't miss a single call. Features such as combined Missed Call Alert and Voicemail, SMS services and Unified Messaging provide a unique opportunity to attract customers even if you have low message retrieval and deposit in your network.

Empowering subscribers

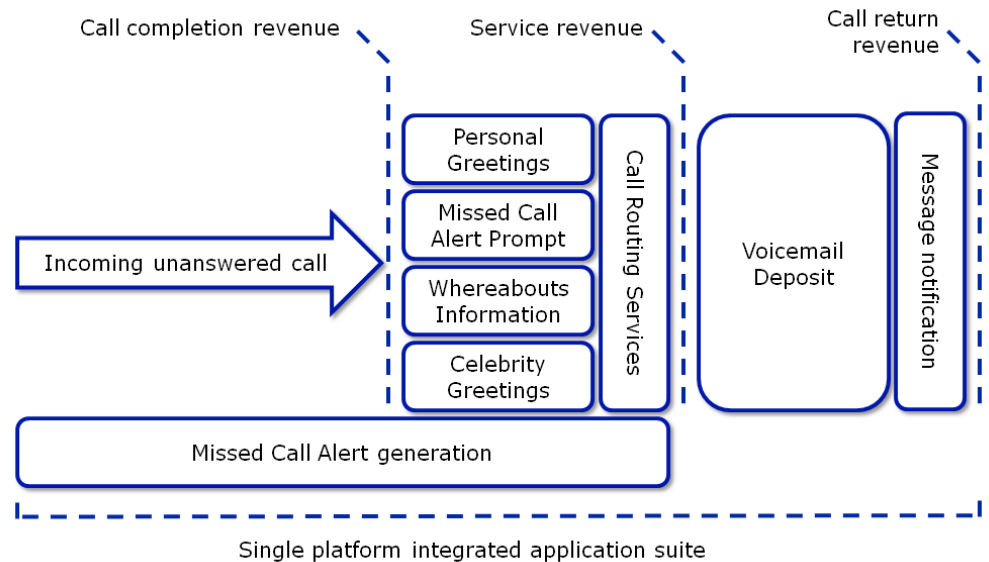

All Teligent Telecom applications are designed with the subscriber in mind. Through flexible and powerful interfaces covering voice (IVR), Web and mobile Web Teligent Telecom provides your subscribers with the means to access their services in the most convenient manner to them without restrictions on how they want to use your services.

By ensuring the user-experience and assisting you in continuously monitoring your subscribers' usage patterns Teligent Telecom provides the best possible utilisation of the available services and, at the same time, assures that your services remain fresh and responsive to your subscribers' needs in an ever-changing competitive market place.

Convergent networking

All of Teligent Telecom's Value Added Services are based on our patented middleware-platform the Teligent P90/E. The Teligent P90/E is an industry leading converged telephony platform which supports existing fixed and mobile networking as well as next generation SIP and IMS.

Proven in leading tier 1 operators worldwide, the Teligent P90/E offers unprecedented networking capacity and scalability. Combined with the inbuilt multi-platform, multi-site deployment possibilities the Teligent P90/E is suitable for networks both large and small allowing localised service offerings from a centralised fully-redundant topology.

Industry leading capacity, scalability and resilience

Teligent Telecom's messaging applications serve billions of calls a year across Europe, Africa and Asia to millions of subscribers with the latest messaging features via multi-lingual and multi-cultural voice and web interfaces. The Teligent P90/E is proven in leading-operators worldwide to support fully redundant distributed configurations ensuring your services never fail to deliver.

Our reference customers

Leading operators worldwide such as TeliaSonera, Maroc Telecom, Singtel and more trust Teligent Telecom to delivery their core messaging services to their subscribers.
